

*Flexibility? Oh yes, we can build a breakout cable or module to meet your needs.*

With more than 200 pins available our UB0B-200 can support a great number of systems. See our sample capabilities list. If you don't see what you need we can build it for you. We also provide custom made modules that fit the UB0B-200 such as our Audio, Video, Relay, Expanded test points or a unit to fit your unique needs.

**Designed by Technicians for Technicians!** This breakout box is designed to breakout over 200 pins plus 8 coaxes . Each breakout can be switched on or off, 400+ test points allow circuits changes on the fly saving considerable time not having to play trial and error with aircraft wires. Isolate threatening circuits, reverse signals, measure lines still under load. Our Universal breakout box is built with common connectors so you can build your own breakout harness or we can build it for you.

# One UBOB is all you need.

**Save time and money** by getting to the problem quickly. Having the ability to check circuits HOT or LOADED or make changes without changing the aircraft side till proven is a huge time saver. Verify missing or present Valid signals. Measure working signals and data streams while they operate. With the use of proper test equipment insert and read digital data busses. Our UBOB is truly a great asset for all technicians and benches alike! **Yes, our UBOB also comes in a 19" rack mount.**

Have a specific system you need to breakout? Do other manufacturer's offer a BOB at some enormous price for a unit that only has one primary function?

**Our Universal Breakout Box or UBOB**

Yes they do. Why not have the ability to breakout that system by only adding the interface harness to our UBOB? If you already own our UBOB then the price of a new harness is all you would need.

Every Harness comes with its own carrying case and custom overlays so there is no confusion as to what pin you are testing.

Need to break-out 300 pins or more? We can special build to meet your needs, Just give us a call.

## SAMPLE OF CAPABILITIES

Cable	System	TIIT Cable P#
SG-817 SYMBOL GENERATOR	SPZ-8000	T2T106S-106S

**Common connectors.**

So you can build your own breakout harness or have us do it for you.

**One box many uses.**

**Shipped in Quality Storm Case**

Each UBOB-200 comes complete with its own Storm brand carrying case with rollers. Harnesses can be tucked in beneath UBOB to simplify travel.

The UBOB-200 lists for \$8,000

Harnesses range from \$1,800 or more depending primarily on pin count and connector cost.

Modules like the Relay breakout list for \$1,800 and include relay breakout harness.

Our Audio / Video modules lists for \$1,200 and includes a color monitor,

**Relay Breakout Module for common relays such Leach, Airpax, Allied Control, ES Portland,**

Our Relay Breakout Module or RBOM-4, will not only breakout 4 pole relays while they are still in circuit, it will also test the relay contacts and coil for proper operation with LED's to annunciate contacts as open or closed. Our RBOM-6 adds a 6 pole relay socket. Relay breakout harnesses are included for 4 & 6 pole units.

Our RBOM's are also available as a stand alone units.
